

7th Annual Cook Medical and RPA Pancreatico-Biliary Workshop 2016

Sunday 13th - Monday 14th November, 2016

INVITATION

On behalf of the organising committee, I wish to invite you to the 7th Annual Cook Medical and Royal Prince Alfred Hospital Pancreatico-biliary Workshop. The workshop is sponsored by Cook Medical as part of their Vista Education and Training program, and will be held over two days on Sunday 13th and Monday 14th November, 2016. Once again the format will be a multi-disciplinary approach to diseases of the pancreas and biliary system. There will be a didactic component as well as an interactive component. The Sunday programme will include breakout sessions for nurses and fellows, followed by interactive clinical sessions and state of the art lectures. The Monday programme will be expanded to include live cases in all three disciplines with all day surgery, IR from RPA and Liverpool Hospitals and live endoscopic cases both ERCP and EUS.

Our keynote international guests will include Prof. M. Canto from the USA and Prof. M. Bruno from the Netherlands. Both are leading experts who will provide insights into best practice and future advances.

It is with great pleasure that we announce a collaborative relationship with the Australian Pancreas Club (APC) and their annual scientific meeting to be held on Saturday the 12th November and the morning of Sunday 13th. Details of the APC program and registration will be posted online at www.pancreas.org.au in July. This meeting along with our clinical symposium will provide a comprehensive educational experience from the lab to the patient over a three day period.

We hope to see you there, and remember to register for the meetings as numbers will be limited.

Arthur Kaffes
